Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 4/9/07.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Amendment

1. The amendment papers filed 2/27/07, 7/14/06, and 4/20/06 were not compliant with the current amendment practice; Therefore, those papers will not be entered and the examination is based on the original disclosure filed 3/19/04.

Election/Restrictions

2. Applicant's election of Invention I: claim 1 in the reply filed on 4/9/07 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Accordingly, claims 2 and 3, which directed to the non-elected invention are withdrawn from further consideration.

Information Disclosure Statement

3. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Drawings

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: "(13)" on line 3 of page 6 and "(5)" on line 4 of page 6. Corrected drawing

Art Unit: 3751

sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

5. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

6. The abstract of the disclosure is objected to because the implied phrase "The objection of this invention is create an inexpensive toilet" on line 1 should be avoided, it is recommended to change it to --A toilet--. Correction is required. See MPEP § 608.01(b).

Appropriate correction is required.

Claim Objections/Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 1 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

8. The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure, which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. Note the format of the claims in the patent(s) cited. A few problems are as follow: the language "low cost" in line 1 neither has prove or structure so should be avoided in the claim; "bubble dispenser/bidet adapter" in line 3 should be --bubble dispenser and bidet adapter--; "low volume" in line 4 should be --low water volume--; "water in-line" in line 4 should be --a water in-line--; "male/female" in line 5 should be --a male or a female--; "the toilet tank" in line 6 should be --a toilet tank--; it is unclear as to what "it" in line 6 is referring to; it is unclear as to what "means of threaded capping screws" in 8 is trying to claim; etc. The claims should be carefully reviewed and revised such that each of the claimed elements have a proper antecedent basis and the necessary structural relationships between the elements are properly defined.

9. As best understood, claim 1 is free of prior art of record.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Burns, Funk, Haddon, Kuhlman, Burmeister, and Von are the references listed by the applicant in the specification. Cannizzaro and Fukuda disclose other sanitary devices.
